Subject: Prep for 10/24 mtg with Ecology on WA hydro permits

Hi Everyone (FYI to Dan),

As you all know, our meeting with Ecology on the WA hydro permits and their draft 401 cert is next Wednesday, 10/24 from 230-430pm. I drafted an agenda which is attached. Since Ecology requested the meeting, they may want to cover different issues. However, I took a first cut to get the ball rolling. I've shared this draft agenda with Ecology and am also getting the final list of people attending from Ecology. If you have comments on the agenda, please let me know.

From my perspective, the key goals are:

- To have EPA provide information on the permit and the draft 401 certification request
- To discuss how other Columbia River activities may or may not affect the scope of the NPDES permits
- To clearly understand factors affecting draft 401 certification issuance
- To lay out options for moving forward on permits and 401 certification
- To discuss timing and next steps for making a decision to move forward

I've also drafted some potential options and considerations for moving forward on the draft 401 cert and permits. I'm not going to send the options to Ecology, but we can discuss this at our planning meeting on Monday (12-1pm). I think this will help us organize our thoughts, talk through issues, and state/push for our option preference at the Wednesday meeting.
